Postponement of the men's triathlon event – weather

Summary:

Tswt sri qirxsj xi qir wxrex psri irx weather

Details:

Following a meeting on water quality held on 30 July at 3.30am attended by Paris 2024, representatives of World Triathlon and their Technical and Medical Delegates, the International Olympic Committee, Météo France, the City of Paris and the Prefecture of the Île-de-France Region involved in carrying out water quality tests, Paris 2024 and World Triathlon have q ehi xi hi gnwar xs tswt sri xi qir wxrex psri irx l rgl ewhyi xs fi li ph sr 74 yp ex eq 2

Considering the latest weather information, it hawfi ir hi gthi h xs vgli hyp xi qir wxrex psri irxsr 75 yp ex 54l 8 2 Xi sqir wxrex psr mwhyi xs xedi tpegi xi weqi he ex eq 2Fsxl wxrex psr wev wyfri gxs xi jswl gsq mk ex vx vww complying with the established World Triathlon thresholds for swimming. A contingency day remains in place for August 2. Paris 2024 and World Triathlon reiterate that their priority is the health of the athletes. The tests carried out in the Seine today revealed water quality levels that did not provide sufficient guarantees to allow the event to be held.

Unfortunately, meteorological events beyond our control, such as the rain which fell over Paris on 26 and 27 July, can alter water quality and compel us to reschedule the event for health reasons. Despite the improvement of water quality levels over the last hours, the readings at some points of the swim course are still above the acceptable limits.

Updated information regarding tickets and broadcast of the events on Wednesday July 31 will be shared in the next hours.
